UI/UX Design Systems & Figma Guide

Visual Hierarchy, Typography Tokens, 8pt Grid & Component States

Shared on SkillExchange Hub • Author: Sarah Miller • Date: October 2026

1. Design Tokens & Color Harmony

- Primary & Secondary palettes: choose cohesive 60-30-10 distribution.
- Functional shades: Success (emerald), Warning (amber), Danger (rose).
- High contrast text: ensure WCAG AA (4.5:1) minimum ratio.

2. The 8pt Spatial Grid

- Scale margins, gutters, and padding in multiples of 8 (8px, 16px, 24px, 32px).
- Consistent component heights (buttons: 40px, 48px, inputs: 44px).

3. Prototyping & Micro-interactions

- Use smart animate in Figma for fluid page transitions.
- Include hover, focus, active, and disabled states for all interactable elements.
